CURRICULAR OVERVIEW & DISTINCTIVES

At Covenant Academy, our high school curriculum is designed to empower students to reach their full potential by engaging in rigorous, comprehensive liberal arts coursework across all academic disciplines. All core curriculum courses except on-level math are taught at an honors or college-level in the Upper School and emphasize:

- The Great Books, classical languages, mathematics, and natural sciences.
- Integration of history, literature, philosophy, theology, art, and music.
- Harkness and Socratic discussions to employ both logical reasoning and rhetorical skills.
- Strong foundational mathematical skills and reasoning in both the on-level and advanced courses.
- Laboratory experimentation in all science courses.

As part of the formal Rhetoric coursework, students develop a capstone thesis project through meticulous academic research, skillful analytic and persuasive writing, an oral public presentation, and defense of their developed thesis before a panel of faculty.

ADMISSIONS

Admission is a selective process based on the academic records, teacher recommendations, entrance exam scores, and family interviews. Covenant does not discriminate on the basis of race, color, or national or ethnic origin. We maintain a strong tuition assistance program to ensure socio-economic diversity.

STUDENT LEADERSHIP

Covenant is committed to being a community of faith, learning, and service. Students are equipped for leadership through involvement in the House System and daily service to the school. All students are members of one of four houses, which provides opportunities to build community, engage in fun competitions, and develop leadership and mentoring skills in small squads with younger students. Servant leadership is further developed through planning and organizing events for the grammar school, serving on campus service teams, and through appointed and elected leadership roles.

EXTRACURRICULAR ACTIVITIES

Multiple team sports are offered each year. Students also have the option for off campus physical training to allow for athletic development beyond what the school offers in areas such as equestrian riding and pre-professional ballet training. Students may also become members of the Student Council and National Honors Society. Students have achieved acceptance and participated in summer academic, study abroad, leadership, and athletic programs at various universities across the U.S.
